

CLEARVIDEO CONFERENCING

Simplify and scale multiparty video meetings

Pervasive adoption of video across business communities is expanding requirements for conferencing scale and reach. With our ClearVideo Conferencing Service, SPS is evolving video and conferencing solutions to help businesses expanded their collaboration strategy across their organizations and ecosystem, without having to make the investment in infrastructure. ClearVideo offers an efficient means of scaling call and conferencing to deliver business-quality video, ensuring that the user experience is always consistent irrespective of network, meeting type, or endpoint.

Optimal experience regardless of endpoint or network

ClearVideo features a high-capacity bridge that enhances the resolution and image quality of both standard and high definition video calls regardless of network speeds. ClearVideo handles both HD (720p) and telepresence (1080p) video resolutions. Standards-compliant and compatible with all major vendors' video conferencing endpoints, ClearVideo delivers a flexible and scalable solution that puts the industry's most sophisticated technology to work for you and your organization, delivering performance in every configuration and an excellent experience for each participant, every time. No matter how big or small your business or organization, you can meet with anyone, anywhere and communicate more effectively and efficiently with our ClearVideo technology and support.
